

When I Get Where I'm Going

*When I get where I'm going
I'll be where you are
I want to sit and talk with you
And to wish upon a star*

*I'll tell you how I've missed you
And longed for this day
My sorrows are all gone now
Now that I'm with you to stay*

*You've always meant everything to me
You were my pride and joy
I'll never forget the day they said
"Tammy, here's your little baby boy"*

*You grew up so fast and quick
And turned into a handsome young man
Wish I had more time with you
This is something I can't understand*

*Never new pain like this before
Never thought I could hurt so much
I long to see your smile, your face
And to once again feel your touch*

*A mother's love sure runs deep
It's a love only a mom will know
A love that will always stay strong
Even though you had to go*

*When I get where I'm going
I'll be with you
I know this in my heart, to be true*

Mom
